

Ready Pack
_KR 60

The KR 60 Ready Pack _irresistibly short delivery times

With its optimally coordinated components, the KR 60 Ready Pack is an impressive solution in every respect. Since the product package is ready for shipping in just four weeks, you can integrate the efficient automation solution smoothly into your production landscape within a very short space of time. The flexible KUKA robot included in the Ready Pack stands out with a robust design and an unbeatable payload/reach ratio, making it ideally equipped for maximum performance in terms of cycle time and accuracy.

The KR 60 Ready Pack _irresistibly short delivery times

KR 60-3

The 6-axis industrial robot with jointed-arm kinematics offers precision and versatility. Beyond this, it has high path accuracy and top positioning characteristics. Thanks to its robust design, the KR 60-3 operates reliably and with maximum availability over long periods. This provides low maintenance requirements and a high degree of planning reliability.

KUKA smartPAD

With its large, high-resolution touch display, the KUKA smartPAD supports intuitive robot operation. Interactive dialog windows give users a transparent overview of the operating procedures and provide them with all the elements required for a specific task. This makes automation easier, quicker and more efficient.

KR C4

One system controls everything: robot, motion, sequence, process and safety control. The KR C4 unites all the control tasks for the efficient use of robots in a single, smart system. With maximum energy efficiency. This sustainably conserves valuable resources and minimizes the cost risks inherent in rising energy prices.

Software

KUKA offers you expandable system software and ready-made robotic applications, integrated Soft PLC and extensive simulation tools – all in the familiar Windows design, 100% compatible and adapted to your automation solution. With the software from KUKA, your robots and systems are always programmed for productivity.

Software / Options

- Freely configurable software types
- Connecting cable set
- Accessories
- Energy supply system A1–A3 as an option (ES handling with 2x compressed air, control cable, Profinet and Multibus cables)
