Payload diagram

The KR 300 R2700-2 C is designed for a rated payload of 300 kg in order to optimize the dynamic performance of the robot. The maximum payload of 366 kg applies only if the position of the center of mass is 0 mm and a supplementary load optimized for the load case is mounted. The specific load case must be verified using KUKA.Load or KUKA Compose. For further consultation, please contact KUKA Support.
